Terraform state management

Questions?

Homework

Do

- Configure all Terraform modules to store state in Azure Storage account (including pipelines).
- Create an automation to deploy a configuration for Booking API.
- Create docker-compose file to run Booking API locally.
- Create an automation (using any tool) to deploy an App Service for Containers running NGINX. Map NGINX default website folder to Azure Storage File Share.

Deadline

Recommended – by the
end of the day 30.09.2022

Maximum – by the end of
the day 30.09.2022
